

## QAD Primary Students Spread Happiness

The children in Grade 3 were kind enough to spread out kindness and love around our school by making 'Dots of Kindness' for other people.

This project was linked to our fabulous 'Dot Day' on 15<sup>th</sup> September - but Grade 3 started the fun earlier and kept it going!

Students wrote lovely messages on paper dots, then signed them and passed them on to someone else.

Haya, one of the students in Grade 3, explained: "One day, a lovely girl came into our class smiling. Then, she gave us a dot to sign and she left smiling more than before!"

Grade 3 received back 8 dots fully signed by 20 people each - that's a lot of happy children and staff!

Grade 3 are amazing because they made a lot of people feel special, very happy and have a better life. They made some new friends too!

Children in our school are very generous and caring. They love to make others feel special.

Wonderful traditions like this will make people smile the most they can and make our school better.

Grade 3 students and teachers are proud to share their 'Dots of Kindness'

**"One day, a lovely girl came into our class smiling. Then, she gave us a dot to sign and left smiling even more!"**

## E-Waste Recycling

The community at QAD are recycling old electronic devices for unfortunate people who can't afford to get one. If some devices are broken, we will through them away safely.

Feeling excited about recycling.

We can help to make our big planet be green again. Recycling these devices is another step to make our world better.

Everyone should recycle in their houses too. We all need to be kind and caring to our planet and other people. We are always happy to help everyone who needs us.

## World Teacher's Day

Teachers give us information about everything: They tell us about pollution, plastic waste and even world problems. But how can we tell them that we really, really, really appreciate them?

World Teacher's Day (on 5<sup>th</sup> October) was a day where our teachers celebrated. They were very excited because the students wanted to be extra good for them.

Some children got teachers flowers, some painted them a picture or (even better) got them chocolate! And they were so happy!

If you forgot to get something, don't worry. Just be super good in class, send them an email telling them you appreciate them or maybe just do your homework!

We need to respect all teachers so that they can educate us. Thank you, teachers, you rock!

Yummy treats for super teachers!
